Your business system:

Charity & Not for Profit Organisations

Charity & Not for Profit

Inspired IT solutions for Not for Profit organisations.

With consolidation, intense competition for funding and donations, as well as complex reporting to funding owners Not for Profit organisations require flexible operational systems so their staff are able to devote as much attention as possible to individuals needs.

Today's Not for Profit organisations need to be able to anticipate change and adapt their processes to meet a wide range of challenges and these include:

- Providing financial records that are robust, reliable and have the highest integrity
- Operating with a geographically dispersed workforce
- Continually gaining new funding to support operations
- Flexibility to adjust processes due to consolidations and introduction of new programs.
- Maintaining privacy while keeping track of clients and identifying the needs of individuals
- Understanding requirements across many programs so that funds are directed to areas of greatest need and benefit

How technology is streamlining Not for Profit organisations services

To overcome the challenges, Not for Profit organisations need a comprehensive, simple familiar IT business solution, that is broad and flexible so the user can drill down into the detail and trends can be easily identified.

With a deep understanding and experience of the issues facing Not for Profit organisations, Hands-on Systems can tailor the end-to-end Charity and Not for Profit Industry Solution to support your staff, organisation's processes, control and decision making.

Combining market leading Microsoft Dynamics business solutions with Hands-on Systems proven expertise in the non-profit industry we can help you to gain real visibility, productivity and results for clients and provide your staff with a familiar environment to work with.

Solution for Charities and Not for Profit organisations

Combining the market leading Microsoft Dynamics™ business solution with proven low cost Microsoft technologies, the solution provides organisations with real time insight across the entire enterprise.

Efficiency and Effectiveness

- By acquiring the newest and most suitable technologies while maximising allocation of funds to client care means that the competing requirements of efficiency and client care can best be satisfied.
- Improve team efficiency, allowing people in any location to easily interact.
- Meetings can be held on-line which substantially reduces travel costs.

Reporting

- Data is in one system so it is easy to enter and accurately identify financial transactions, which means it is simple to satisfy diverse requests for reporting from internal, government and external sources.
- Working with specific budget allocations and registering progress by funding source.
- Using supporting technologies such as Business Intelligence and Microsoft Office SharePoint means every user can see how they are performing against their KPI's and collaborate with their colleagues wherever they are located.
- Reporting is simplified so that all employees in the organisation can instantly access the data relevant to their role.

“We are impressed with the Microsoft Dynamics Solution. It has reduced data input times and exponentially enhanced our reporting capabilities. We are also impressed with the adaptability of the product, the ease with which changes can be made to reports and screen design etc.”

– Greenacres Disability Services

Manufacturing

- Integrated manufacturing provides the ability for organisations with manufacturing facilities to manage their supply chain and manufacturing output in the same business system

Personalised Service

- Integrated client entries provide a complete historical record so that at a glance relevant personnel can see client interactions and outcomes. This provides the best opportunities for individuals to achieve and succeed in providing excellent service.
- Comprehensive information is available on the web including geospatial pictures, and vital statistics that can be securely shared with clients, researchers and potential fund providers.

Familiar tools mean minimal training

By using proven Microsoft solutions, staff can use the Microsoft Dynamics ERP solution with a high degree of confidence. The interface design and functionality works just like the productivity tools staff use everyday such as Microsoft Outlook, Word and Excel. This results in ease of use, seamless integration and maximisation of return on investment in existing Microsoft applications and operating systems.
