## **METGASCO – now LIVE with DYNAMICS NAV and HANDS-ON SYSTEMS**

In April 2009, Metgasco began the implementation of the Microsoft Business Solution, Dynamics NAV. Within three months Metgasco was live with the new Microsoft solution and managing their Job/ Project budgets completely integrated with Financials and Fixed Assets. The solution was implemented on time and under budget.

Michael Andrews, Financial Controller stated: “The immediate benefit was having a reliable single source of truth to analyse our projects and budgets with real-time dimension reporting. We can view reports in NAV and with one-click, export data to Microsoft Excel for further analysing. It just makes life easier for us. We also implemented Microsoft Dynamics NAV Payroll, which means all our financial data is in the one system. It allows us better reporting as all the information flows directly into the General Ledger, and our staff are already used to the interface and processes which means less training.”

**“We highly recommend Microsoft Dynamics NAV and Hands-on Systems as an Industry implementation partner.”**

Would your business like to experience the same success?

Hands-on Systems would welcome the opportunity to speak with you in person about your organisation and situation so we can better understand your needs and determine whether you can achieve similar benefits to companies such as Metgasco, Drillsearch, Delhi Petroleum, Triton Hydrocarbons and Beach Petroleum.
